SUMMARY

Software Developer specializing in full-stack web development, with experience in mobile and game development. With foundational knowledge in cloud services and DevOps practices, including deployment, CI/CD, and basic cloud infrastructure. Strong ability to collaborate in team environments, follow SDLC best practices, and build scalable, maintainable, responsive, and user-friendly applications.

PROFESSIONAL EXPERIENCE

Sikat Tech Inc.

June 2026 - Present

Software Developer

- Contributed to accounting SaaS applications using React, TypeScript, and TanStack, while contributing to an early-stage architecture of a multi-tenant system using Google Cloud Spanner.
- Containerizing and deploying applications via Docker across Google Cloud Platform (GCP), managing cloud infrastructure with Terraform (IaC), and collaborating through Git-based development workflows.

Freelance Developer

January 2024 - Present

- Web Developer: Built dynamic, responsive websites using HTML, ReactJS, Tailwind CSS, PHP, Bootstrap, Angular, and JavaScript, with secure database management in MySQL and Google Firebase.
- Game Developer: Created engaging games with C#, Unity, and Blender, and using GitHub and Azure DevOps for collaboration.
- Mobile App Developer: Developed mobile apps using Ionic, Angular, and TypeScript, specializing in Android.

Pamantasan ng Lungsod ng Valenzuela

February 2026 - June 2026

Software Developer

- Led the team that developed an RFID Integrated Recording System for the University Registrar using React Electron, React, Node.js, Express.js, and MySQL with Sequelize ORM to streamline enrollment, student identification, and record processing.
- Handled the system's end-to-end deployment, which included bridging separate physical campus buildings using VLANs and a local switch network infrastructure to enable cross-building client-server communication.

ELI IT Solutions

June 2025 - January 2026

Junior Software Developer - Project-Based & Internship

- Contributed to Accounting, CRM, and ERP systems as a full-stack developer, building and enhancing multiple modules using MySQL with Sequelize ORM, React.js, and Node.js.
- Designed and optimized RESTful APIs, implemented feature enhancements, bug fixes, and performance improvements, strengthening frontend to backend communication, system stability, and maintainability.
- Developed responsive React interfaces with Tailwind CSS, integrated backend services via Axios and Redis for caching, and collaborated effectively using Git/GitHub.

Pamantasan ng Lungsod ng Valenzuela - University Registrar

November 2024 - December 2024

IT Staff - Apprenticeship

- Enhanced technical support skills, managed documents and files, and developed report writing, team communication, and organizational skills.
- Performed data encoding, document organization, and student ID processing using tools such as Microsoft Excel, Adobe Photoshop, and the school's management system.

Franbelle Medical Oxygen Trading

November 2022 - September 2024

Customer Service Representative & Sales Agent

- Provided end-to-end customer support and sales assistance, handling inquiries, resolving issues, processing orders, and maintaining accurate documentation.
- Drove sales growth by promoting medical oxygen products, building strong customer relationships, meeting sales targets, and managing sales records using Microsoft Office tools, and online platforms (Facebook Ads, Carousell/OLX).

RECENT PROJECTS

Student Record Management System

February 2026 - June 2026

- Developed for the Pamantasan ng Lungsod ng Valenzuela as a supplementary tool for Student Enrollment.
 - Led the development of the project, overseeing planning, design, and implementation.
 - Built using ReactJS, TailwindCSS, MySQL with Sequelize ORM, Express.js, Figma, and GitHub.

Elapsed TimeQuest Android Game

April 2026 - May 2026

- Developed for a client as a supplementary learning tool to help students for early childhood education.
 - Served as the lead developer, leading the full-stack development of the project and deployment.
 - Built as an Android application using Unity 2D, Figma, GitHub and Android Studio.

Nolimosyon Web-Based learning Application

February 2026 - April 2026

- Developed for a client as a supplementary learning tool for students studying the Noli Me Tángere Novel.
 - Worked as a full-stack developer and responsible for deployment of the application.
 - Built a responsive web application using ReactJS and TailwindCSS, with Firebase for backend services and GitHub for version control.

EDUCATION

Pamantasan ng Lungsod ng Valenzuela

2022 - 2026

Bachelor of Science in Information Technology

- Best Student Internship Awardee
- Dean's Lister (2022-2026)
